

Push2TV (Netgear) Tips

Before connecting your Surface to the Push2TV box, make that the following (Android) image being projected.

If you can't see that image, here are some things you can try:

1) Power cycle the Push2TV box. To do this, detach and reattached the smallest cable leading into the box:

2) Make sure the second small black box (signal conversion box) is receiving power. You can tell that it is if the small red light on the front of the box is on:

Note that it can take about 15-30 seconds for the Push2TV to reset.

If after doing steps 1 and 2 the “Android” is not coming up, here are a few things for you to check:

3) Is your projector set to the right input?
You can cycle through the projector inputs using the projector remote

4) If your connection to your projector is also being routed through a document camera, is the document camera set to the “PC” source?
